

How to Request AiCure Access as a Site Coordinator

Per AiCure policy, we may only process access requests that have been submitted to us by users identified as **Authorized Requestors** within the sponsor team.

Please reach out to the study sponsor assigned to your site and request to be granted access. They can have your information added to the Site & User Tracker (SUT) which can be submitted to us. We will then use this to grant you access to the appropriate trial and site.

For security purposes, Sponsor/CRA approval is required to grant access to site coordinators.
