

How to Request AiCure Access as a Sponsor/CRO/CRA

Per AiCure policy, we may only process access requests that have been submitted to us by users identified as **Authorized Requestors** within the sponsor team.

Please have the Site & User Tracker (SUT) updated with the relevant information. The Authorized Requestor identified for your trial can then submit this document to AiCure support to be processed. ONLY current and actionable changes should be highlighted in the SUT so ensure changes already submitted in previous requests are not highlighted.

An updated SUT is required for all access requests. Per our policy, [we cannot process any access request without the SUT included as an attached file](#). For the fastest turnaround time, the Authorized Requestor should attach the SUT to their original request.
